

# GENERAL MANN TELLS FRAZIER ABOUT MIX-UP

Writes Governor Personally Expressing Regret for Mistake Regarding Second

MANY OFFICERS MAY BE DISQUALIFIED BY LAW

Number of Company Commanders as Well as Field and Staff Do Not Comply

General W. K. Mann, chief of militia bureau, in a personal letter to Governor Frazier this morning, explains the mix-up with reference to the Second regiment. The general says: "The fixed rule of the bureau in regard to the strength of companies to be accepted has been to require a minimum strength of 1,000. Through some inadvertence due to the press of business, a telegram was prepared and sent to the adjutant general of North Dakota in June, saying that the strength required would be 65. This information did not originate with that part of the office concerned with the raising of infantry regiments and companies, and, although my name was signed to the message, it was not brought to my attention until yesterday. As soon as I learned of it, steps were taken to rectify the matter, and in order to keep faith with your officials, who were acting on what they believed was the authorized minimum strength of new companies, recognition was immediately accorded the three companies which were under a strength of 100 men, but over a strength of 65. I am sorry there was any misunderstanding, and hope the organization of the regiment now may be completed at an early date."

The companies to which General Mann refers as being under 100 men but over 65 were, B, F and K. His letter still left the fate of the regiment as a whole at doubt, but last night Major Settle, chief mustering officer for North Dakota, received instructions to muster in the fourth company, which theretofore had been denied federal recognition—Co. L of Hankinson, which succeeded in recruiting but 33 men—and the major announces that the acceptance of the 12 infantry companies means recognition for the Second as a whole, and the mustering in of the headquarters company at Bismarck, the supply company at Hillsboro, and the sanitary detachment at Minot.

Sen. Wm. C. C.

The first official act of John M. Baer as congressman of the First district, whose election was certified to Washington yesterday by the state board of canvassers, was a wire to Governor Frazier, supplementing those of Senator McCumber and Representative Norton, advising that the Second had been saved.

Officers in Doubt.

While the acceptance of the Second as a unit now seems assured, the fate of the field and staff officers and a number of the company commanders remains in doubt. Practically every field and staff officer exceeds the limit for his grade. This is a regulatory matter, which may be waived. The provision of Sec. 74, requiring officers to be selected from the national guard or reserve officers' list, however, is a legal enactment, and what authority the war department may have to ignore it and accept North Dakota officers who fail to comply with these provisions is a question.

Adjutant General Fraser this morning expressed the sincere hope that the war department may see its way clear to accept the field and staff officers named, as he declares, they are men of exceptional ability and standing, whose rejection would be a serious loss to the regiment. He has recommended to the war department that it use its utmost authority to make exceptions in favor of these officers.

Company Officers Out.

All of the commissioned officers of Co. A, Minot, are held disqualified under Sec. 74 of the defense act. Captain Wheeler of Co. B, New Rockford, is ruled out. The first and second lieutenants of Co. C, Crosby; all of the officers of Co. F, Carrington; the captain and first lieutenant of Co. G, Rolla; the captain of Co. H, Harvey; the captain and first lieutenant of Co. K, Ellendale; the captain of Co. L, Hankinson; all of the officers of Co. M, Beach, and all of the officers of the Dickinson machine gun company will be ruled out if the section is strictly enforced. This will mean the officering of these companies by men from the First regiment. Co. I of Bismarck, Co. D of Devils Lake and Co. E of Langdon are the only units of the Second whose officers have qualified in every respect and have been accepted subject to the provisions of Sec. 74.

Gov. Frazier and General Fraser leave this evening to attend review of the "commencement exercises" at the officers' training camp at Fort Snelling, where approximately 200 North Dakotans will finish their three-months' course and some of these, it is hoped, will be commissioned.

## Octogenarian Dies While Endeavoring To Stop Runaways

Huron, S. D., Aug. 9.—Omar Wilcox of Greeley, Ia., aged 81, was crushed to death, when he tried to stop a team of runaway horses at the home of his brother, Lewis Wilcox. The octogenarian had been in South Dakota only a short time.

# Bedding to Care for All Is Offered

Appeal in Tribune Gets Hearty Response From People of Bismarck

## TWO SOLDIERS QUARTERED AT ST. GEORGE'S PARISH

Bismarck did not know that members of Company I were without sufficient bedding to keep them warm and comfortable.

But The Tribune told the city the facts last evening and—

Well, Secretary Keniston was a nervous wreck today answering telephone calls far into the night.

There was enough bedding, coats and supplies offered to quarter a regiment, and squads of the company started out today to collect the donations of blankets, coats, mattresses and other kinds of bedding.

Two soldiers are quartered at St. George's parish house. Rev. Buzzelle tendered the use of the double cot there.

It is now certain that the boys will be comfortable until the war department decides upon a point of mobilization or hastens enough supplies here to properly quarters the boys.

There is still a great need for reading material, especially magazines. Both Company I and the boys at Fort Lincoln are out of reading material. Send your donations to the Commercial club. The Y. M. C. A. is doing a good work at the Fort and the people of Bismarck can help by sending books and magazines which are collecting dust in the garret or cellar.

# U. S. SOLDIERS LEARNING ART OF WAR FAST

Deepest Impression Gained to Camp in France Is Earnestness of Men

## SIX MONTHS TO YEAR IS NEEDED FOR TRAINING

The American Training Camp, Aug. 9.—The deepest impression one gains after three weeks with American soldiers training in France is the absolute earnestness of the men. There is no disposition to under-estimate the seriousness of the task and the hard work which must be done before America can take her place on the actual firing line.

Feel Responsibility.

The troops here feel their responsibility keenly. The men are earnest in their desire to absorb war knowledge as quickly as possible, and as thoroughly as possible, for when called upon to act as instructors to succeeding units they will be qualified. A great deal of this earnestness is largely the result of enthusiasm of young officers, who but recently joined the colors and have taken up the business of war with courage and determination.

Under the best circumstances, training of soldiers in methods of modern warfare requires months of painstaking efforts. A thousand of the most valuable men in the British army for instance, did not put a foot in France until after they had had a whole year of training at home.

Boys of Seventeen.

On the other hand, Germany called boys of 17 years last September, and sent many of them into the trenches after only six weeks of infantry training.

This was possible because these boys were merely distributed among old, seasoned troops—stop gaps in the ranks of decimated divisions.

Six months is nearer the ideal training period, but this rule applies to armies which have been fighting three years, and have all the machinery necessary through which the men are passed on to the front.

The building of this machinery is the staggering task now being dealt with. It is a task in a way greater than anything France or Great Britain has been called upon to do for America's problems are those of France and Great Britain multiplied by three thousand miles of Atlantic ocean.

Daily Thrills.

The daily thrills and tasks necessarily are much the same thing over and over again, all of which mean a death of real news. But the soldiers are anxious that the folks at home should know that the absence of news does not mean absence of work. Nor can the value of each day's training actually be told until the American soldiers at last stand out as the finished product.

It is not known how long the French instructional division will remain with the Americans. The latter are proving so apt that undoubtedly it will be only a short time when a few picked French officers will be retained to assist in the training.

Morale Is Good.

Students of the war are convinced that the morale of the troops and the morale of the nations of the entente will prove to be the final factor. The morale of the American soldiers in France can easily be estimated, by the avidity with which they take up training in offensive tactics as against the defensive work. They are sincere.

Students of the war are convinced that the morale of the troops and the morale of the nations of the entente will prove to be the final factor. The morale of the American soldiers in France can easily be estimated, by the avidity with which they take up training in offensive tactics as against the defensive work. They are sincere.

# Jack De Saulles, Freckled Lad of Five, Had Too Many Parents, Now He Has None; One Dead, Other Behind Bars

WHICH DOES LITTLE JACKIE DE SAULLES MOST RESEMBLE? Here are father, mother and son in the tragedy of mother love which ranks next to the Thaw case in the dramas of American life. Close scrutiny will reveal the features of each parent in the chubby child's face, which is the composite of both.

# CORN AND OATS CROP LESS THAN FOR LAST YEAR

Government Estimates for August Shows Decrease in Two Important Grains

## WHEAT LOOKS ALMOST 100 PER CENT BETTER

Washington, D. C., Aug. 9.—A summary of the August crop report for the state of North Dakota and for the United States, as compiled by the bureau of crop estimates (and transmitted through the weather bureau), United States department of agriculture, is as follows:

Corn.

State: Aug. 1 forecast, 1,140,000 bushels; production last year (December estimate), 1,515,000 bushels.

United States: Aug. 1 forecast, 3,190,000 bushels; production last year (December estimate), 2,582,211,000 bushels.

All Wheat.

State: Aug. 1 forecast, 61,000,000 bushels; production last year (December estimate), 53,750,000 bushels.

United States: Aug. 1 forecast, 673,000,000 bushels; production last year (December estimate), 639,886,000 bushels.

Oats.

State: Aug. 1 forecast, 48,200,000 bushels; production last year (December estimate), 53,750,000 bushels.

United States: Aug. 1 forecast, 1,460,000,000 bushels; production last year (December estimate), 1,251,992,000 bushels.

Barley.

State: Aug. 1 forecast, 27,400,000 bushels; production last year (December estimate), 26,738,000 bushels.

United States: Aug. 1 forecast, 202,000,000 bushels; production last year (December estimate), 180,327,000 bushels.

Rye.

State: Aug. 1 forecast, 9,310,000 bushels; production last year (December estimate), 4,655,000 bushels.

United States: Aug. 1 forecast, 56,000,000 bushels; production last year (December estimate), 47,383,000 bushels.

Flax Seed.

State: Aug. 1 forecast, 6,040,000 bushels; production last year (December estimate), 8,137,000 bushels.

United States: Aug. 1 forecast, 12,800,000 bushels; production last year (December estimate), 12,800,000 bushels.

# To the Boys Who Were Drafted

BY HAPSBURG LIEBE of the Vigilantes

The writer of this little message to you, boys, has himself been an American soldier, and he is very proud of that fact. He knows army life, and he has seen red-hot fighting, and he knows the ways of officers.

I will put it like this. I will simply tell you what I would do if I were going into the army again. First, I would go into it with the rock-firm intention of whipping Germany. I would look at the matter just like that. Save that I would certainly not discount the importance of anybody else, I would believe, so far as it was possible, that it was up to me to me, myself, to give Germany, the earth's pariah nation, the licking that is going to make all nations safe to a world democracy.

And the moment I was sworn into the service, I would resolve that, no matter whether it suited me or not, I would obey orders, very strictly and to the letter. That is the magic phrase—it is the religion of the army; above orders. During my time in the army, no man who lived up to that as his motto could go through with a term of enlistment without having a chance of being made a corporal, or a sergeant, or even a sergeant-major. There are few commissioned officers who will overlook the enlisted man who never disobeys an order, when promotion becomes necessary. And in this war men from the ranks are going to win commissions, boys, remember that!

But every man in the army, or in the troop, or in the battery, or in the company, has to be a gentleman, and it happens to be a gentleman, that you say, and you are right. But every man can be a soldier. How much there is bound up in those three little words! You'll know yourself, after a while.

A real, dead-in-the-wool American soldier, of course, is a gentleman, too.

However, there is bound to be a chance for you to win your chevrons. You never yet seen the men who tried hard for promotion, and if he tried honorably who came out of it a private. In spite of their like military manners, officers are just like you under the skin. They are quick to recognize and they are most heartily glad to recognize the golden qualities of a soldier and a gentleman in an enlisted man. Remember that, too!

Also, remember this. You are in the service to fight for your country and the right to make soldiering a trade, and you are going across the Atlantic for a purpose of whipping Germany and for no other reason. So long boys, and good luck to you, and may the good God of our fathers bring you back to us!

# Baby Takes Poison Left In Window

Dies in Ten Hours From Dose of Formaldehyde After Race Against Death

## PARENTS RUSH CHILD TO DOCTOR IN AUTOMOBILE

After a race against death in an automobile with a child suffering from a dose of formaldehyde, the parents lost.

The boy died 10 hours after taking poison which he had found on a window sill while his parents were out of the house.

Frank Amel, one-and-a-half years of age, was laughing and playing on the floor when his parents left their home near St. Vincent, Morton county, yesterday morning.

Shortly afterwards they returned to find the boy suffering death agonies. A bottle in which only a small portion of formaldehyde had been left, was empty near the victim.

The parents rushed the child to their automobile, and as fast as the machine could carry them, brought the boy to a physician at St. Vincent. Everything was done to save the child, but he died a few hours after reaching the town.

Frank Amel was the son of John Amel, a prosperous farmer.

# NEGRO TELLS OF HOW CREW WERE SLAIN

German Submarine Destroyed Lifeboats and Boats of Belgian Prince

## SURVIVOR HID PRESERVER UNDER A RAINCOAT

Liverpool, Aug. 9.—William Senell, a negro, of Jacksonville, Fla., the only American survivor of the British steamship *Belgian Prince*, which was sunk July 31 by a German submarine with the loss of 38 lives, today gave details of his experiences to the Associated Press.

"A torpedo hit the engine room. The submarine then quickly came to the surface and fired at our wireless apparatus. We left the *Belgian Prince* in three boats, and had got 50 yards from the ship when the submarine came alongside and asked for our captain, who was taken aboard."

"We were then ordered to the deck of the submarine, where we were told by the commander to remove our lifebelts and lie on the deck. This we did. Then the commander went into the boats, threw the oars into the sea, and had his men remove the provisions. After that the plugs were taken out of the holds in the boats, which were then cast adrift."

Destroys Lifeboats.

The submarine went to the north-east for 12 miles, the commander taking the lifeboats to the top of the conning tower and throwing them overboard. I hid mine under a raincoat, and when the submarine began to submerge, I tied it around my neck and jumped into the sea. The rest of the crew stayed on deck until they were swept off by the sea. One by one they threw up their hands and went down, splashing water as they disappeared."

# MANY SLAVS LEAVE FLAG OF CENTRAL POWERS

Corfu Island of Corfu, Aug. 9.—There are two whole Serbian divisions—40,000 men—which entered the war under the Austrian flag, fighting against the Entente allies and which today have turned squarely around and are fighting under the Entente colors against the Central powers. This fighting under two flags is one of the queer romances of the big war, related by Professor Yamitch, private chaplain of King Peter of Serbia, as illustrating how the conglomerate Slav population of southern Austria-Hungary is ready to break away from the Hapsburg master.

These two divisions, originally Austrian, were forced into the ranks early in the war from Bosnia, Croatia, and Herzegovina, the Slav states forcibly annexed by Austria. It is the great hatred of Slav agitation.

The Austrian staff held the Slav forces in reserve for a time, well knowing the bitterness in the ranks. But when General Brusilov's great drive began a year ago, in Galicia, the Austrians had need of every man. This brought the Slav division into line and for the first time Slav was facing Slav, the southern Slav element being thrust forward to meet the rush of their brothers from the north. It was literally a fight of brother against brother. But the ties of race were stronger than flags.

# 76 REGISTRANTS EXAMINED UP TO NOON IN COUNTY

Rejections for Physical Disqualifications Ran Heavier Yesterday Afternoon

## MANY CANDIDATES CLAIM AGRICULTURAL EXEMPTION

District Board Will Have to Pass on Large Number of Cases—Officers Working

## CHANGE RULES.

Washington, D. C., Aug. 9.—Revised regulations to govern physical examination of men registered under the selective draft were issued today by Surgeon General Goigas and communicated to the governors of the states for information of local boards. The changes may recall some of the men who have been rejected.

Seventy-six registrants had been examined and about a dozen eligible for selective service who claim no exemptions of any kind had been accepted; when the Burlington county board adjourned for lunch at noon today.

Physical disqualifications ran much higher yesterday afternoon than during the forenoon. The board worked until midnight last night without adding greatly to the number of men positively accepted for service. The number of notices of claims for agricultural exemption is growing. These claims are not filed with the local board, but with the state board. A number of registrants, however, have notified the local board that claims for agricultural exemptions will be filed.

Letting Bars Down.

An important letting down of the bars as to physical qualifications was announced from the adjutant general's office this morning, following receipt of telegraphic instructions from Provost Marshal Crowder. The 53 local boards were advised that a reduction of from five to six pounds is allowed in the minimum weight of registrants measuring 64 to 67 inches, seven to eight pounds in registrants measuring 67 to 69 inches, nine to ten pounds in registrants measuring 70 to 74 inches, and 12 pounds in registrants 75 inches or more in height. A reduction in chest measurement of one-half inch in registrants above 68 inches is allowed, providing there is no lung trouble. Well fitting artificial teeth, dentures or plates are accepted in lieu of missing molars; men may be accepted with either eye not quite up to the more rigid tests heretofore laid down, and any discharge of the ear, perforation of the tympanum or dry ear is not held a disqualification.

Registration Data.

Registration data compiled this morning by Charles Leissman of the adjutant general's office shows that 51 legislative, judicial or executive officers registered in North Dakota on June 5, 137 registrants were totally disabled; 2,732 indicated dependent relatives; 3,974 indicated occupational exemptions; these classes being included among the white citizens and declared exempt from friendly countries of whom there were a total of 57,688, 27,576 of this number claiming no exemptions.

Dependency.

A new ruling from Provost Marshal Crowder on the subject of dependency wired local boards today notes that the general basis for arriving at dependency is the spirit of the select service act, which authorizes the president to discharge registrants whenever it appears advisable because the loss of his civil income will inflict hardship upon his family. The act, General Crowder advises, aims to avoid leaving any dependents with lack of support. But where support from other sources is available, a discharge is not held advisable, as in cases where the parents or other relatives are capable and ready and willing to provide for a wife and children during the absence of the husband; where a wife owns land which has produced an income with the labor of her husband, but which could be rented easily and certainly, or where the salary or wage of the husband is continued in part or in whole by a third person or where it alone or with the soldier's wage added is adequate to the support of the dependent wife, children, widowed mother, infirm father or orphaned child under 16.

Burlington County Registrants.

The last 24 hours has resulted as follows: Charles Kappeler, rejected, deaf and dumb; Thomas Costello, claim for dependents, Earl James Nixon, rejected, bad hearing; Harry Bernstein, rejected, under weight; Walter James K. Hines, accepted; Hugh E. Loomis, claims agricultural exemption, Joseph Kreitzer, accepted; Alex. McLeellan, physically disqualified; George Wahler, passed; Tiederman P. Brunick, dependent mother and agricultural claims; Simon Peter Olson, dependent wife and child; William M. Murnane, rejected, under weight; William August Larson, dependent wife and child; Ray C. Dorland, physically disqualified; Carl Verne Erickson, claims agricultural exemption; Ed Deltz Moffit, physically disqualified; Hans Garsen, physically disqualified; Charles H. Davenport, physically disqualified; Jovan P. Miller, claims exemption for dependent wife and child and employment in postal service; Jacob Warner, dependent wife and child; Orlando Waleh, physically disqualified; Roy Kroil, accepted; Leo A. Meyers, physically disqualified.

## NORTH DAKOTA NURSE TO STAY WITH SOLDIERS

**Endersin Girl Had Expected to  
Return, But Can't Leave  
With Sammie Coming**

Endersin, N. D., Aug. 8.—"I expect to stay only six months, but now that our troops are here and more coming, I'm sure I don't know when I will be back," writes Gertrude Lebbitt, North Dakota's ambulance nurse to her mother here. "The number of wounded is awful—the heavy drive is not far from here," writes Miss Lebbitt. "We can hear the guns roar continuously, as we are in the invaded district, but I hope it won't be long before the Germans will be pushed back on their own soil. I never realized how dangerous a chance I was taking when I sailed for Europe. Everyone was uneasy—no one slept—on the watch every second. All lights were out, portholes darkened, and even the light of a match on deck, and speeding along at breakneck rate in the dark, not knowing what moment we would go down."

"The food condition is terrible," says Miss Lebbitt, who mourns for the "nice dinners we have at home, with all we want of everything." "We are allowed no butter, no cake, no sugar, and before the winter is over it will be terrible. Prices here are worse than in the States, by far. Shoes are \$25 to \$35."

## Kensal Volunteers Best Looked After Soldiers in the State

Kensal, N. D., Aug. 9.—Kensal made its volunteers the wealthiest men in the North Dakota regiments, when they raised a purse of \$1,043 for recruits enlisted from this community. A benefit concert netted \$374, the Commercial club gave \$200, and there were individual subscriptions ranging up to \$100.

## Mrs. Budlong Will Collect Books and Magazines for Army

The American Library association is organizing every state in the union to supply soldiers with good reading material, and it has notified Mrs. M. C. Budlong, secretary of the North Dakota public library commission, that she has been named chairman for this state to supervise the collection and distribution of books and magazines. Mrs. Budlong has for some time been in charge in North Dakota of the work of the American Federation of Women's clubs, which is collecting scrap books for hospitals at the front. The present movement is of a different nature, and its purpose is to place in the hands of soldier boys good books and magazines not more than two years old, which will relieve the tedium of trench and camp life. Public libraries throughout the state have been made repositories for such reading materials, and Mrs. Budlong asks all good citizens having books or magazines to donate to leave them with their nearest public library, which will report to Mrs. Budlong.

FOR TAXI SERVICE PHONE 342.

## Electric Voter Would Speed Up Congress Inventor Says

Bornett L. Bobroff and face of his electrical voting machine as it shows above the speaker's desk in Wisconsin's assembly chamber; below, part of photographic record of a vote, "N" standing for "no," "Y" for "yes," and a blank space for not voting.

### Staff Special.

Milwaukee, Wis., August 9.—The Wisconsin assembly having completed a session with the use of his electrical voting machine, Bornett L. Bobroff of this city thinks he may be able now to speed up Washington and take most of the con out of congress.

With Bobroff's voting apparatus, he says, a legislative body can complete a vote in 25 seconds. This means casting the vote, counting it, photographing it and announcing the result. He says it never should take more than one minute.

With the Bobroff machine the members vote by putting a Yale

lock key in an apparatus on their desks. The key is turned one way for "yes" and the other for "no." The member's own vote shows on his own desk and on a big board at the front of the chamber.

Each vote is photographed by a camera that is part of the voting machine and at the end of the session there is a photographic record of all votes.

Bobroff says several states are considering installation of the machine, among them Ohio. The question also is before congress.

Eight years ago Bobroff was a clerk in the bureau of efficiency and economy in city hall. Now he has a half dozen inventions doing business for him.

## SCORE OF HOME GUARD UNITS IN NORTH DAKOTA

Many Communities Organizing  
for Protection From Domestic  
Foes in War

A score of home guard units has been organized or now is being formed in North Dakota. Wahpeton was one of the pioneers in the movement, and Fargo was quick to take advantage of an opportunity for protection. Lidgerwood has a guard of 50 members. Kenmare has a company of 73. Tower City and Hillsboro are lining up, and Leeds recently organized a large unit. Cavalier county is organized, with a central company at Langdon. Carrington has a company of 50 men, which meets all trains, protects men seeking work and sees that the vagrant class moves on. Bismarck has a strong company, and the Slope regions generally are well organized. In order to procure federal recognition, arms and ammunition, these home guard companies must be recommended to the secretary of war by the governor. Frazier has not made such recommendation in the case of any of these units to date.

## RED CROSS WORK MAKES PROGRESS IN NORTH DAKOTA

Chapters Organized in 29 Counties—No Difficulty Experienced  
With Finances

Fargo, N. D., Aug. 9.—The organization of Red Cross chapters has been completed in 29 North Dakota counties, reports to Judge N. C. Young, state chairman, show. The state chapter has organized divisions in nine other counties. It is expected that by the end of the ensuing week the entire state will have been covered by Harry Curran Wilbur, executive secretary. Poor crops are proving so much better than anticipated that Red Cross work in this state will not be hampered by lack of funds, Secretary Wilbur announces. In Flaxton, Burke county, where \$1,000 was set as the

maximum for a week's campaign, \$700 was raised on the date of organization. The Kidder county chapter, organized but a week, has pledged \$1,000 and paid in \$1,000.

## I. W. W. ENTRENCHED FIGHT ARMED POSSES

Globe, Ariz., Aug. 9.—Telephone lines leading toward the asbestos mines from Globe, Ariz., are out of commission today, and the sheriff's office believes the wires have been cut by the Indians and striking miners, who have started forest fires and surrounded nine white men employees of the asbestos mines 50 miles northwest of here. The men are said to be in a dugout, and their supplies of

ammunition are low, and they have only a small quantity of provisions. It was feared that they would not be able to withstand the combined assaults of the warriors and the forest fire.

Because of the lack of communication, details of the uprising are unknown, but reports indicated that two organizers of the I. W. W. had been working among the men for the last week and have instigated the strike which led to the revolt.

### ILLINOISAN FIRST

**Sucker State Candidate Passed at Beach and Enlisted**

Beach, N. D., Aug. 9.—Ernest C. Wood of Galesburg, Ill., examined at the request of the local board in his home city, was the first man passed and enlisted in the National army by the Golden Valley board.

## All Traces of Scrofula Eradicated from the System

By the greatest of all purifiers.

A common mistake in the treatment of scrofula has been the use of mercury and other mineral mixtures, the effect of which is to bottle up the impurities in the blood, and hide them from the surface. The impurities and dangers are only added to in this way.

For more than fifty years S. S. S. has been the one recognized reliable blood remedy that has been used

with highly satisfactory results for Scrofula. Being made of the roots and herbs of the forest, it is guaranteed purely vegetable, and absolutely free from all mineral ingredients.

You can obtain S. S. S. from any drugstore. Our chief medical adviser is an expert on all blood disorders, and will cheerfully give you full advice as to the treatment of your own case. Address: Swift Specific Co., Dept. P. Atlanta, Ga.

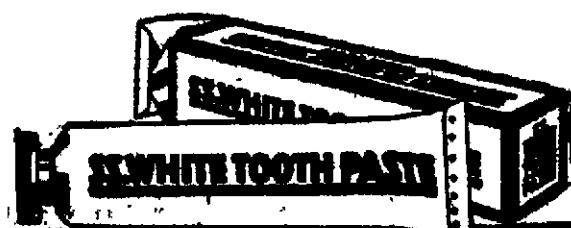

## THE TEST OF TIME

—finds The S. S. White Dental Manufacturing Company still in unquestioned lead as the world's best-known and most reliable manufacturer of dental equipment and supplies.

In the same way time has disposed of one dentifrice fad after another, until dentists now know that the sole function of a tooth paste is to cleanse. S. S. White Tooth Paste is a pure, wholesome, non-medicated cleanser—the most efficient on the market. It is made according to a non-secret formula approved by the highest dental authorities. And it is as pleasant to use as it is efficient.

Your druggist has it. Sign and mail the coupon below for a copy of our booklet "Good Teeth; How They Grow And How To Keep Them."

Please send me a copy of "Good Teeth; How They Grow And How To Keep Them," also a sample tube of S. S. White Tooth Paste.

NAME \_\_\_\_\_ ADDRESS \_\_\_\_\_

## THREE CHILDREN DIE SUDDENLY

Hazen, N. D., Aug. 9.—Three children of Jacob Zurn, a farmer who lives 12 miles northwest of here, have died during the past week from diphtheria, and three more of his children are now recovering from the disease. No medical aid was summoned until after the death of the first child, and physicians say all three lives could have been saved with proper medical attention.

The three children who died are: Jacob, Marie and Edward, aged four, seven and nine, respectively.

### BAER ELECTED; STATE CANVASSERS SAY SO

John M. Baer is the duly elected congressman from the First North Dakota district. This fact was discovered this morning, when the state

board of canvassers held a recent session in Secretary of State Hall's office, canvassed the vote in the recent special election and found the totals as announced in the unofficial returns yesterday. A certificate of election, signed by the governor, secretary of state and attorney general was mailed to Washington today.

## JACK DE SAULLES, FRECKLED LAD OF FIVE

(Continued from Page One)

chutes on his father's lawn, he had to go back to that other playground if he wanted to see his mother. And now Jack has been taken from both playgrounds by Mrs. August Hecksher, of Huntington, a cousin of De Saulles.

Mrs. De Saulles never was able to understand why the court had granted her husband, proved guilty of misconduct with another woman, the custody of the child part of each year. She feared the father's wealth and social political influence might eventually take the boy away from her.

Court to Settle Future. Little Jack's future will probably be settled by the supreme court. Whether the mother is convicted or freed, the court may decide she is not a proper person to have the child. By risking all to obtain him, she is likely to lose him completely.

Meanwhile the see-saw and the chute-the-chutes, the swing and the shooting gallery, are empty.

The Alrodale terrier at his father's house is lonesome. And the big white bull pup, which his mother brought with her in the taxicab on the night of the shooting, is in the care of the black butler at "The Crossways." A freckled, tanned little boy, with hair cut straight around the back just below the ears, has gone to a new home—the third in a week.

### BARN AND HORSES BURN

**Dan McPhee Sustains Heavy Loss From Fire Near Golva**

Golva, N. D., Aug. 9.—A large log barn and eight horses on the Dan McPhee farm was burned to the ground. A volunteer fire brigade succeeded in saving the dwelling house and the granaries. The loss was several thousand dollars.

## U. S. SOLDIERS LEARNING ART

(Continued from Page One)

ly anxious for their turn in the trenches to come.

The men are anxious for a glimpse of war and there is no doubt that after they get it, it will add infinite zest to their future training and to their ability to train future divisions. The men are still far enough from the line to hear or see little that has to do with real fighting. A brief tour of duty in the trenches will explain much to them, however, and will make them appreciate the training which they do not wholly understand.

Jean Justice  
and her  
Willys Knight Eight

World war effects are being reflected not only in automobiles, but in their upholstery and in appareling of chauffeurs and footmen.

The militaristic tendency was most noticeable at the Automobile Fashion Show at Sheephead Bay in the Willys-Knight car entered by Jean Justice.

This car was the newest example of the forthcoming style and might have been designed for the commanding general of the army so studiously did the designers and decorators adhere to the khaki color scheme.

The car, an eight-cylinder Willys-Knight touring model with Victoria top, was of two-toned tan, the body and running gear being of a lighter shade than the Victoria top.

Inside, the car was finished in olive drab with chauffeur and footman in olive drab liveries. This car attracted much attention, not only from the army people in attendance at the show, but from society people as well, because of its unique and timely color scheme.

After the liquid evaporates it produces a heavy gas which penetrates from room to room and descends into cellars. It is tenacious in character, and seems to make more victims among women than among men, closing about their head. The fumes of tobacco seem to act as an antidote. The odor is variously described as resembling that of acetylene, nignonette, or pungent mustard.

St. Paul, Minn., Aug. 9.—Dr. Fritz Bergmeier, president of the St. Paul Volkszeitung, was arrested today by order of President Wilson under the proclamation of April 6. It is charged that the Volkszeitung has been "casting aspersions by innuendo on war measures of the United States."

## PLAN TO TURN CONGRESS INTO BIG CHAUTAUQUA

Washington, D. C., Aug. 9.—Congress may turn itself into a great chautauqua when it finishes its work here, to enlighten every section of the country on the need of prosecuting the war vigorously, not only as a war for world democracy, but as a fight for American rights and preservation.

President Wilson himself may "do his bit" in the same direction, possibly by a speech on some occasions, or by a letter to congressional leaders.

Plans were in a nebulous state today, but the undercurrent in official quarters was toward such a move.

Congressional leaders were talking of practically putting congress on the stump by asking every representative and senator to go through his district during the recess, speaking on the part of the United States in the war, and emphasizing that the United States is fighting for a future, not of the world, but of itself.

Those who favor the plan point out that the country is hearing many agitators who oppose the draft and participation in the war. They think that the people should hear some things of the other side of the question, and from official sources.

Those who oppose the plan point out that the country is hearing many agitators who oppose the draft and participation in the war. They think that the people should hear some things of the other side of the question, and from official sources.

itary or other public defense purposes or to conserve foodstuffs. Congressional leaders understand the president does not intend to commandeer distilled spirits or to curtail their consumption unless military exigencies require. The so-called Smoot amendment directing federal purchase of distilled beverages in bond at cost plus 10 per cent profit, was eliminated.

In lieu of house provisions authorizing the food administration to fix the minimum prices for all necessities, the law provides that the food administration shall fix a minimum price for wheat alone. Until May 1, 1919, the bill provides that the basic price shall not be less than \$2 per bushel, based upon No. 1 Spring Northern at all primary markets.

Sweeping powers to control coal prices also are provided. The bill authorizes the president, through the federal trade commission or other agency, to fix coal and coke prices, at the mines and among wholesalers and retailers, to regulate method of sale, shipment and distribution among dealers and consumers, and to requisition and operate mines or other coal mining facilities.

A system of federal licensing of all agencies related to the production, transportation and distribution of the designated necessities also is provided, and rigid provisions against hoarding, speculation and monopolization established, under heavy penalties. Farmers are exempted from the hoarding provisions.

The bill also authorizes the president to requisition, for military or public defense needs, all necessities named, and, to guarantee reasonable prices to producer and consumer, to buy and sell fuel, wheat, flour, meal, beans and potatoes. The bill also authorized the president to requisition and operate any factory, packing house, mine or oil pipe line, at just compensation, for military or public defense uses.

Regulation of grain and other foodstuffs markets, to prevent injurious speculation or undue enhancement of prices, is another power conferred upon the food administration through the president.

Another clause, inserted by the senate after much criticism of alleged sale by members of the advisory commission of their own products to the government, prohibits federal agents from soliciting or inducing contracts with the government in which they are interested.

Chicago, Aug. 9.—Hogs jumped to fresh top price levels in the local market today, influenced by an active demand from eastern shippers. A high point of \$16.80 was paid for "heavies."

## WESTERNERS SEE FLAX PROSPECTS FOR BISMARCK

Alfred Andresen Goes to Havre, Mont., to Look Into Tow Mill Proposition

Alfred Andresen, who for more than a year has been promoting the flax possibilities of the Slope country, was called west last evening to Havre, Mont., in response to a wire from Jonas Brodin, former Duluth linen expert, and recently engaged in the tow business at Baker, Mont. Mr. Brodin wired his former associate that a number of eastern capitalists interested in establishing a large tow mill regarded favorably the advantages offered by Bismarck and were anxious to meet Mr. Andresen.

The tow mill enthusiast left on No. 1 last evening armed with a mass of data, all of which tends to prove that Bismarck with its seven converging lines tapping 10,000 square miles of North Dakota's best flax country, is the logical location for a mill. Bismarck has a 15-cent rate on tow to St. Paul, and flax straw can be brought in to this point very cheaply.

The very cheap electric power which the capital city enjoys; the fact that it has an abundance of labor and practically complete freedom from labor troubles are points which Mr. Andresen will urge.

Mr. Andresen was not in position to state just what the proposition would be. The wire from Mr. Brodin indicated that \$300,000 is available to finance the project. Mr. Brodin is now interested at Havre in a heavily capitalized tow mill proposition which has Colonel Perkins, former superintendent of schools in Bismarck, back of it.

ained colorless liquid. In the streets and in the court yards and gardens, where the shells burst, traces of the noxious liquid were found.

After the liquid evaporates it produces a heavy gas which penetrates from room to room and descends into cellars. It is tenacious in character, and seems to make more victims among women than among men, closing about their head. The fumes of tobacco seem to act as an antidote. The odor is variously described as resembling that of acetylene, nignonette, or pungent mustard.

Close Confinement. "What you need is exercise," said the eminent specialist.

"I agree with you, doctor," answered the patient, in a fretful tone.

"That's good."

"But I must confess that I get preposterous little of it while waiting in an anteroom three hours to see you."

Rough Tactics. "Take my advice," said the man who has a great deal of litigation. "Do anything rather than go into court."

"I tried that once, and it taught me a lesson."

"How so?"

"I was given a stiff fine for resisting an officer."

Principal Contents. "Lend me something to read."

"With pleasure. What do you want—history, philosophy, fiction or poetry?"

"Oh, nothing heavy. Just lend me one of the late magazines and I'll read advertisements."

Hollering Stations. Mr. Krusty—Young man, with that voice of yours you ought to be with some company on the road.

Young Man (who has just sung)—As a tenor in grand opera?

Mr. Krusty—No; brakeman on some railroad.

Entirely Misleading. "Did I understand you to say that Glithers has read a great many books?"

"Yes, but he has profited little."

"Surely there is inspiration to be found in good books?"

"I'm not denying that. The kind Glithers reads contain so-called short cuts to wealth."

Supposed Funny Boarder—Will somebody kindly chase the cow down this way?

Landlady—Mary Ann, take the cow down where that calf is bawling.

Supposed Funny Boarder—Will somebody kindly chase the cow down this way?

Landlady—Mary Ann, take the cow down where that calf is bawling.

# FRAZIER FAVORS MINES' SEIZURE AS LAST RESORT

Governor in Favor of Giving Operators Chance to Make Good Before Acting

"If satisfactory results cannot be obtained in any other way, I would be in favor of the federal or state governments taking over the coal mines and working them," said Governor Lynn J. Frazier this morning. "I am of the opinion, however, that the conference planned by the defense councils of the 16 coal producing states may get results. I have had no formal invitation to attend such a conference and know nothing more of the proposal than I have seen in the newspapers. I have nothing to say at present as to the fuel situation so far as the lignite producers of North Dakota are concerned."

North Dakota lignite mines are making every effort to increase production to the maximum. Native coal prices were boosted locally 25 cents per ton last spring, but no further advance has been made. Freight rates on lignite coal from the mines were boosted approximately eight cents per ton by the Nonpartisan league's new distance tariff measure passed last winter. Whether the producer or the consumer will assume this added charge remains to be learned.

# SOUTH DAKOTA IN RANKS OF ENEMIES TO BARBERRY BUSH

Agonomist at Brookings Agrees That Shrub Is Responsible for Rust

Brookings, S. D., Aug. 9.—South Dakota has joined with North Dakota in war on the barberry bush, which the latter state exterminated by act of legislature this spring as one of the prime causes of rust in wheat. A. N. Hume, professor of agronomy at state agricultural college, writes R. E. Cone, president of the Huron Commercial club, that the barberry bush is generally recognized as a cause for rust, and that Canada and Norway are contemplating legislation against it. The spores of *Puccinia graminis*, produced on wheat stalks, find opportunity to grow on barberry bush and nowhere else, he declares.

# PLENTY OF HARVESTERS

Farm Hands Working North With Harvest From Texas

Plenty of harvest labor is reported by S. S. McDonald, president of the North Dakota Federation of Labor and employed in the office of the commissioner of agriculture and labor as state labor agent. "We are getting skilled hands now who have followed the harvest all the way from Texas," said Mr. McDonald today. "They are all anxious to work, and to date we are supplying every demand for labor which comes to this office. We haven't had a single instance of I. W. W. troubles reported to date, and there has been no difficulty over wages."

# DR. CARREL TO TEACH WONDERS OF HIS WOUND HEALER TO U. S. ARMY SURGEONS

Famous Research Student Starts Class for Medical Recruits on Carrel-Dakin Treatment Used in France.

BY FREDERICK M. KERBY Staff Special.

New York, August 9.—Before the newly selected national army is in its cantonments, the men who will care for its health and well-being will be in their own training camp learning the latest secrets of the British and French surgeons and doctors for the treatment of wounds and care of the sick.

American surgeons of the Medical Officers' Reserve corps are to have a special course under Dr. Alexis Carrel of the Rockefeller Institute for Medical Research on the Carrel-Dakin method of treating wounds.

On the grounds of the Rockefeller Institute here, a demonstration hospital has been erected, like the great British base hospital at Staples, near Boulogne, France. They are modeled on what is known as the Humphreys system, a patented English type, of the "knock-down" variety, whose principal feature consists of walls capable of being let down in sections, so the wounded and sick can be taken out in a few minutes, in case a hostile air raider is seen. The buildings are constructed in units five feet long and eight or 10 feet high, all fastened with bolts and capable of being dismantled in two days.

"Our success has been wonderful," declared Dr. Carrel today, discussing the new wound treatment. "We have been able to reduce to one-third the time which it formerly took a wound to heal. That means a great deal with hospitals crowded as in war conditions on the front."

The Carrel-Dakin method of treatment consists in first cleansing the wound of all foreign matter, and then placing over it a container filled with the Dakin fluid, discovered by Dr. H. D. Dakin of Leeds, England. The fluid neutralizes the effect of wound infection which, due to the highly cultivated soil of northern France, of the consequent presence of neutralizer all over it, was frequent. The container has a glass

Dr. Alexis Carrel and above, the new model "base hospital" at the Rockefeller institute in New York; below, section of a field hospital ward, showing movable side sections.

tube protruding from it, which flares out into a comb-like arrangement of smaller tubes of rubber. These are performed and are brought into contact with all surfaces within reach of the wound. At intervals the fluid is fed into these tubes and thoroughly enters every part of the wound. The discharges are carefully examined from day to day, until it is known the poison has been successfully eliminated by the Dakin fluid, when the wound is allowed to heal.

The use of this fluid has saved thousands of amputations, and has wonderfully increased the efficient handling of wounded men. It is the big surgical discovery of the war. The method of treatment is so exact, by measuring the cubic space of the wound, Dr. Carrel can compute within an hour the time required for the wound to heal.

Dr. Carrel will start his instruction in a few weeks. He was furloughed from France for this purpose.

# MANDAN ACCIDENT CLAIMS ITS VICTIM WEEKS AFTERWARD

Telegram From Boy's Mother Indicates Death of Arthur Schultz in Illinois

Mandan, N. D., Aug. 9.—A telegram from Mrs. M. C. Schultz, the young man's mother, indicates that Arthur W. Schultz, popular in Mandan, and for three years employed at the Great Plains field experiment station here, wandered onto the railway tracks in front of a train at Hannan City, Ill., and was killed. About two months ago Schultz was badly injured when a wrench fell on his head. After six weeks' treatment he was permitted to leave the local hospital and to return to his home in Illinois with his mother. It was evident then that his injury had affected his brain.

# Babe Kicked to Death by Horse; Dog Is Blamed

Granville, N. D., Aug. 9.—Alvis, four-year-old daughter of F. G. Frairie, collided with a team of horses while playing with a pet dog in the barnyard at her home, and one of the animals, kicking at the dog, crushed in the little girl's skull, killing her instantly.

# Mother Identifies Remains of Son

Jamestown, N. D., Aug. 9.—The remains of a man killed by a Northern Pacific train here last Thursday night were positively identified as Lester B. Carmon of Moorhead, Minn., by the mother of the victim this morning when the remains were exhumed. It is probable that the remains will be shipped to Valley City for interment.

# ASHLEY TO HAVE PARK

State Board of University Lands Takes Favorable Action

The state board of university and school lands today took favorable action upon the petition of the Ashley Amusement Park association for a tract of state land adjoining the village of Ashley to be used as a public recreation park.

**BUY COAL NOW.** You won't regret it. We handle the celebrated Wilton Lignite coal and Northern Wyoming Acme Coal. Washburn Lignite Coal Co. Phone 453. 8-12-17.

# Dragged by Cow Rope, Little Tot Has Broken Neck

East Prairie, N. D., Aug. 9.—A little daughter of Otto Kraft, becoming entangled in a cow rope, was dragged for a half-mile and her neck was broken.

# Veteran Indian Service Man Is Dead in Alaska

Aberdeen, S. D., Aug. 9.—Major E. J. Warner, for years in Dakota Indian service and second in prominence in this connection only to Major McLaughlin, is dead at Anchorage, Alaska, a town which he was instrumental in building up. He was born at Dakota City, Neb., in 1868, and was agency paymaster for a number of years.

# SESSINE HAYAKAWA

The scenes of "Each To His Kind," the thrilling drama of English and India society life, with Sessine Hayakawa, the noted Japanese actor, in the stellar role, which will be at the Bismarck tonight, were laid around one of the famous old colleges at Oxford and in the heart of India. Mr. Hayakawa is seen in this Lasky-Paramount picture as the son of the Maharajah, who is sent to England to be educated. Through the flirtation of a girl he vows a feud against the English and returns to his own country. How his hatred is eventually appeased is depicted in a startling and vivid manner. Supporting Mr. Hayakawa are Tsuru Aoki, the clever Japanese actress; Viola Vale, Ernest Joy, Walter Long and others.

# \$300 to \$400 Less!!

**Willys SIX**  
L Head Type of High Power

Take a look at the new Willys Six. Then get the "feel" of this new car and note its remarkable performance.

Compare it in every way with cars that cost from \$300 to \$400 more.

Then you'll get a real tangible idea of the amazing value we can put into this Six because of the economies of our larger production,—larger than anyone building a similar car.

Note the smart new body design—the double cowl body—slanting windshield—long racy lines—a perfect beauty!

The superior performance of the new Willys Six is due to a new scientifically attained balance between great power and sturdy light weight.

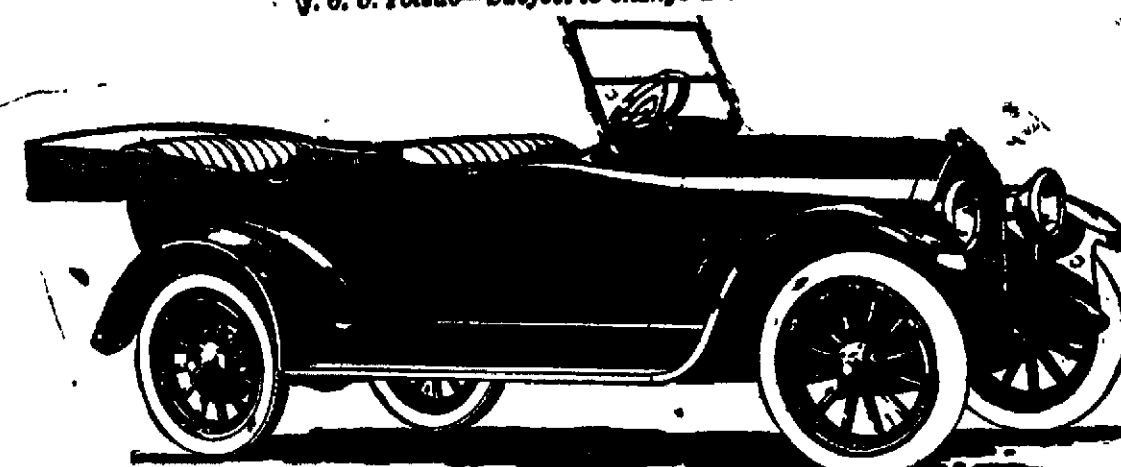

It makes the Willys Six a livelier, snappier car and easier to handle.

There's nothing to compare it with until you come to cars costing \$300 to \$400 more—even then you must take into consideration the superior Willys Six performance.

45-horsepower motor, L-head type of high power  
120-inch wheelbase 48 x 2½-inch cantilever rear springs  
33 x 4½-inch tires, non-skid rear Two disappearing auxiliary seats in tonneau

# STATE POOR BANKER

Has Loaned Most of Farm Funds, Cannot Be of Much Help

The state is in a poorer position than usual this summer to help farmers who may need loans. At present in the state university and school lands fund, which is loaned on improved farm lands in sums not exceeding \$5,000 to any individual and at an interest rate of five per cent, there is only \$150,000. Ordinarily at this season the amount is several times greater, but there was an unusual demand for farm loans this spring.

# CAN'T TOTE IT AROUND

Booze May Be Prescribed But Not Delivered by Docs

Pierre, S. D., Aug. 9.—South Dakota physicians may not carry first aid to snake-bitten about in their prescription cases, rules the state legal department. The only thing he can do in case of need is to write out a prescription calling for liquor, which

may be filled only by a regularly licensed pharmacist

# STUTSMAN BOYS THERE

But One Registrant Among First Fifty Physically Unfit

Jamestown, N. D., Aug. 9.—But one man among the first 50 Stutsman county registrants examined here was rejected for physical disqualifications. The physique of North Dakota candidates for selective service is above the average, federal officers state.

Tribune want ads will bring results.

**Rails Bonded**—The little copper wire connections which are being set into the rails of the Capitol street railway cost the state one round dollar apiece. Raw copper is selling for about 30 cents the pound. These bonds form the very important purpose of connecting the circuit between feed wire and rails, which is decidedly necessary to the proper operation of a trolley line. The state has waited some time for the arrival of these bonds, and now that they are being installed, Bismarck may begin to anticipate the completion of the paving in the downtown district in time for a harvest home festival.
